- ✓ Regression fix for WebApp starter: cannot find StartConfigV3.cache

### 2023.1.007

- ✓ Enable to print reports for Duplicates
- ✓ Enable to configure presettings folder separately for tool and tool list. Configure in WebApp starter.
- ✓ Send presetting file directly without select when there is only one under the configured folder
- ✓ Distinct cost centers for tool requestor's target location
- ✓ Only display "Stock Section" for duplicates transfer
- ✓ Make logistic transaction when transfer duplicate

### 2023.1.006

- ✓ New widget: Duplicates Transfer → This widget is used to quickly transfer tool duplicates by scanner/keyboard
- ✓ Improve CNCArchive
- ✓ ToolRequestor: enable search target locations
- ✓ ToolRequestor: enable remove added items
- ✓ Enable to use white space general match for description in part/assembly/toollist for searching
- ✓ Enable send presetting for assembly/tool list, need configuration in starter

### 2023.1.005

- ✓ Improve login
- ✓ CNCArchive: Display export function when nc file and folder are in no revision/edit/release mode
- ✓ CNCArchive: Support role rights check for NC file

### 2023.1.004

- ✓ Display more actions for brief view mode in CNC archive
- ✓ Only enable import data transfer interface/machine special function when NC folder has no revision or in edit/release mode
- ✓ Only enable export data transfer interface when NC folder has no revision or in edit mode
- ✓ When there is only one import data transfer interface defined for a file, display as "Retrieve"
- ✓ When there is only one export data transfer interface defined for a file, display as "Output"
- ✓ Fix tool list pagination

### 2023.1.003

- ✓ Fix CNC folder status issue: should display the latest one
- ✓ Support cmd/bash program for import/export in CNC folder

- ✓ Improve UX for import/export in CNC folder

## 2023.1.002

- ✓ Support to use import and export interfaces in CNC
- ✓ Add "fresh restart" barcode for SmartBooker

## 2023.1.001

- ✓ Sync major version with WinTool desktop 2023.1
- ✓ Please check old release notes for changes, features or bug fixes

## 2022.3.012

- ✓ Fix tool requestor notification

## 2022.3.011

- ✓ New widget: Tool Requestor  
This widget can help you to create a request to ask tool store to transfer some components/assemblies to a specific location (Machines, or other store). The tool store can be configured in the SmartBooker for different sites.

## 2022.3.010

- ✓ New widget Simple Scanner
- ✓ Fix AnalysisView: wrong legend
- ✓ Enable to search Text-ID for Duplicates
- ✓ Enable upload video for CNCArchive
- ✓ Enable dark mode per user

## 2022.3.009

- ✓ Enable multiple instance of WinTool WebApp in same computer

## 2022.3.008

- ✓ Improve strict security mode:  
You can override any headers by set its related key values in Server\appsettings.json, under AppSettings, you can add StrictSecurityHeaders object with bunch of key values pairs.

## 2022.3.007

- ✓ Improve strict security mode

## 2022.3.006

- ✓ Improve CNCArchive
- ✓ Display error detail for quick support for frontend

## 2022.3.005

- ✓ Add live dashboards
- ✓ Add strict security mode: for some enterprises, they want to restrict the browser behavior
- ✓ Support preview video mp4, webm and ogg in CNC Archive
- ✓ Fix components default filter: should not display catalog data

### 2022.3.004

- ✓ Share wrapper instance when version is same
- ✓ Fix selection issue of ToolDuploManager in mobile

### 2022.3.003

- ✓ Fix send to machine in CNCArchive, it is caused by the WinTool 2022.3 database structure changes

### 2022.3.002

- ✓ Fix WinTool wrapper service config string processing
- ✓ Add a warning for starter when use IIS account

### 2022.3.001

- ✓ 2022.3 is for WinTool desktop 2022.3
- ✓ Support new data schema of CNC archive which is changed in WinTool desktop 2022.3
- ✓ Fix Photo extension issue

### 2022.2.001

- ✓ Start from this version, we will use WinTool desktop version pattern.  
For example, when WinTool desktop 2022.2 released we will release WinTool WebApp 2022.2.001. The last number is for patch, feature, or bug releases.
- ✓ The installation folder will be something like this: C:\Program Files (x86)\WinTool\WinTool WebApp 2022.2
- ✓ And the logs can be found here: C:\Users\Public\Documents\WinTool WebApp 2022.2

### 3.2.4

- ✓ Improve SmartBooker transaction error displaying

### 3.2.3

- ✓ Fix TransactionMonitor issue when UserName is null
- ✓ Fix permission for Smart Booker configuration for cost centers
- ✓ Fix Tool assemblies translation
- ✓ Enable cancel Analyze all transactions for Error Bookings
- ✓ Enable IFH per site for Smart Booker
- ✓ General package upgrade to improve security and stability
- ✓ Increase default size for adding widget

### 3.1.3

- ✓ Improve table controls
- ✓ Add Price column to Transaction Monitor widget
- ✓ Improve UX for Transaction Monitor widget
- ✓ Improve ErrorBookings performance
- ✓ Increase default data fetching page size to improve performance
- ✓ Update IIS docs for light mode required options: WebSocket protocol

### 3.1.2

- ✓ Preview CNC text file like ncp, xml, inp etc.
- ✓ Add permission check for update CNC folder, file etc. Those permissions are defined in WinTool Desktop App CNC Archive/Settings
- ✓ Enable preview PDF in CNC Archive
- ✓ Improve apis error response

### 3.1.1

- ✓ Improve Booking Analysis.
- ✓ Remove date range fields for some analysis which does not support date range.
- ✓ Fix query parameters converting issue.
- ✓ Improve documentation.
- ✓ Add transfer button for duplicates
- ✓ Enable search by toolNr or with duplicate nr

### 3.1.0

- ✓ Use machine types to filter tool or tool list instead of NCMachines
- ✓ Fix CNC archive column name
- ✓ Enable rename widget title

### 3.0.9

- ✓ Fix localization issue

### 3.0.8

- ✓ Improve translation error handling
- ✓ Improve logs collection
- ✓ Add STL viewer for tool

### 3.0.7

- ✓ Enable zoom in/out/pan for any images which support preview. And it also support touch gestures on your phone or tablet.

### 3.0.0

- ✓ Released BLAZOR protentional on asp.net core 6, Microsoft what helps to run .NET on browser directly:
  - ✓ WinTool desktop application's logic to browser directly; just need to port the UI part instead of business logic; migrate WinTool desktop to .NET 6 or just move the shared logic out to .net standard 2.0
  - ✓ BLAZOR hybrid (Mix WinForm/WPF ) / Server (better CPU/Memory) / Wasm (running .NET directly in the browser and run it natively) mode; integrate WinTool WebApp directly into WinTool desktop after it migrate to .NET 6. So all the new features built for WebApp can be shared with desktop; means accelerate WinTool modernization.
  - ✓ makes WinTool WebApp more consistence on the UI part.
- ✓ Added POC for the tool part report widget
- ✓ Added filter function in CNC Archive
- ✓ Improve image cache issue in CNC Archive
- ✓ Improve image upload title duplication & added title option in CNC Archive
- ✓ Added Remarks for duplicates in Process Module
- ✓ Enable edit job quantity in Process Module
- ✓ Enable managing more job steps in Process Module

### 2.1.1

- ✓ CPU consumption massively reduced
- ✓ Significant performance improvements when using large databases
- ✓ Optimizations in handling user reports and dashboard

### 2.1.1

- ✓ Improve WinTool Wrapper starting reliability
- ✓ Do not cache IIS password for security
- ✓ Improve config loading
- ✓ Let user to customize home page logo without replace WinTool's

### 2.1.0

- ✓ Add new starter app

## 2.0.0

- ✓ Migration to .NET Framework 6.0
- ✓ Compatible with IIS
- ✓ New Setup Installation guide

## 1.4.4

- ✓ Add Storage place, stock, available, ordered fields for parts reporting view
- ✓ Add option to enable user to select other when do logistics

## 1.4.3

- ✓ Bug fixes
- ✓ Additional Booking configuration for efficient scanning of booking components
- ✓ Added Booking Checkbox to select one or all bookings

## 1.4.2

- ✓ Minor Bug Fixes

## 1.4.1

- ✓ Minor Bug Fixes
- ✓ Machining Data Evaluation improvement of display
- ✓ Transaction Analysis Extension improvement of display
- ✓ Various optimizations
- ✓ Introduced IIS Compatibility

## 1.3.2

- ✓ General Improvement and Bug Fixes
- ✓ Compatible with WinTool 2021.1

## 1.3.1

- ✓ Improved NC Folder picture display
- ✓ Active Directory login implementation
- ✓ Improved general role rights
- ✓ Auto generate marked report

## 1.2.1

- ✓ Multiple optimizations
- ✓ Compatible with WinTool 2020.3.1

## 1.2.0

- ✓ New possibility do Delete pictures that were made with a Tablet
- ✓ For simplicity the Login page now remembers the Username and autofill it
- ✓ Compatible with WinTool 2020.3
- ✓ Various optimizations

## 1.1.0

- ✓ New possibility to set a Name on Pictures (CNC Archive)
- ✓ For simplicity the Login page now remembers the Username and autofill it
- ✓ Various optimizations

## 1.0.5

- ✓ Compatible with WinTool 2020.3
- ✓ Various Optimizations

## 1.0.0

- ✓ Compatible with WinTool 2020.2
